Sullivan Middaugh Update

Continental Cup Sprint Distance Trends

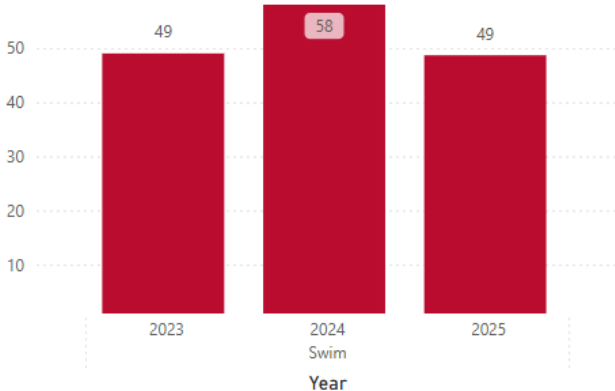

- Sullivan has demonstrated improved swim fitness through his ability to better utilize his run and swim fitness.
- While maintaining similar swim deficit and positioning he has become a better overall triathlete and can utilize his world class bike and run fitness to move into the top 10

Maintain Swim Deficit with Less Energy

Average Place in Race

Average Seconds Down to Leader by Year

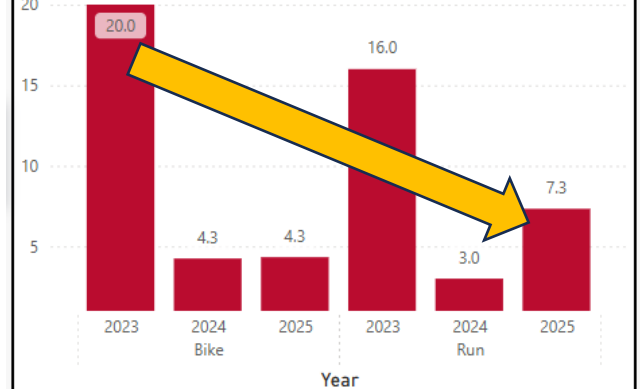

Move Up on the
Bike and Run

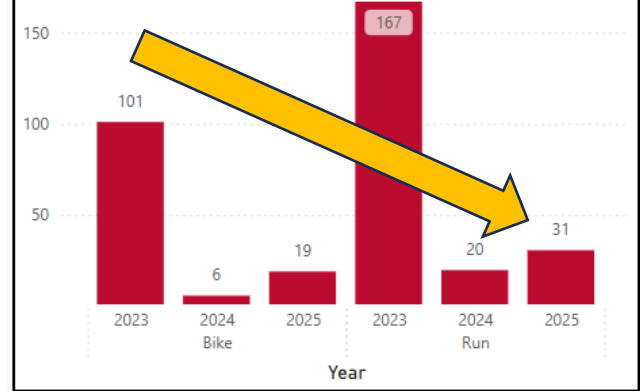

- In 7/8 Races Sullivan had a **Top 3 Bike Split**
- In 5/8 races, Sullivan had the 1st fastest bike split
- In 5/8 races, Sullivan had a **Top 10 Run Split**

Improve From Top 20 to Top 10

Average Place in Race

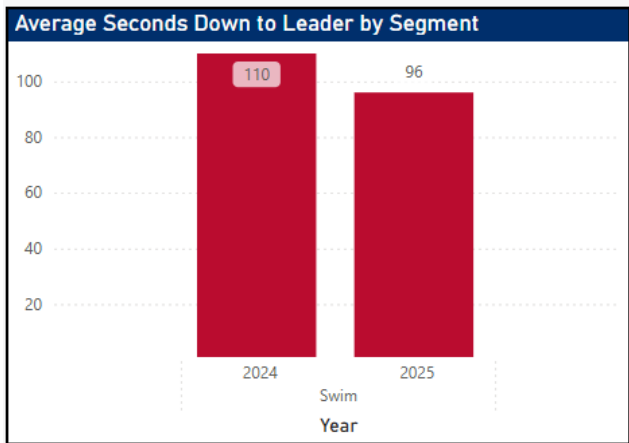

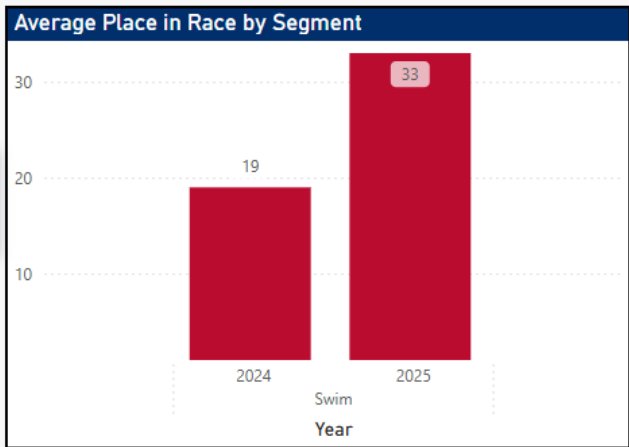

Average Seconds Down to Leader by Year

Continental Cup Championships Trends

- From 2024 to 2025 Sullivan improved from 11th to 2nd at the Continental Championships thanks to an improved swim deficit that enabled him catch the breakaway and start the run at the front

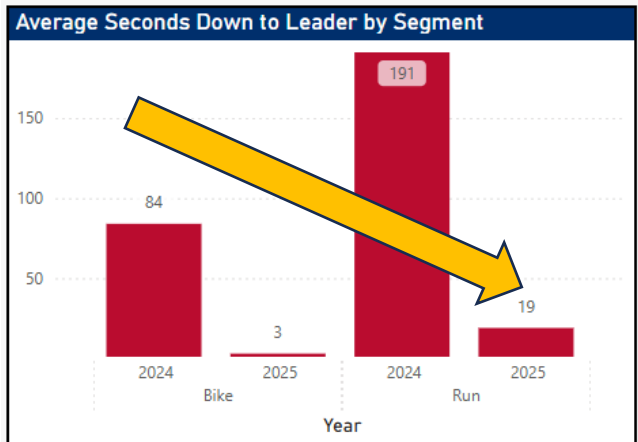

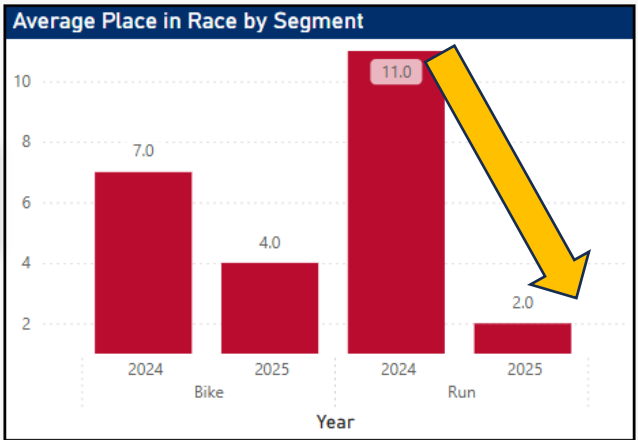

Maintain Swim Deficit with Less Energy

Move Up on the Bike and Run

- Sullivan had the 1st bike in **both** races, but the extra energy allowed him to have the 2nd fastest run split in 2025 vs. 15th in 2024

Move Up From Top 20 to Top 10

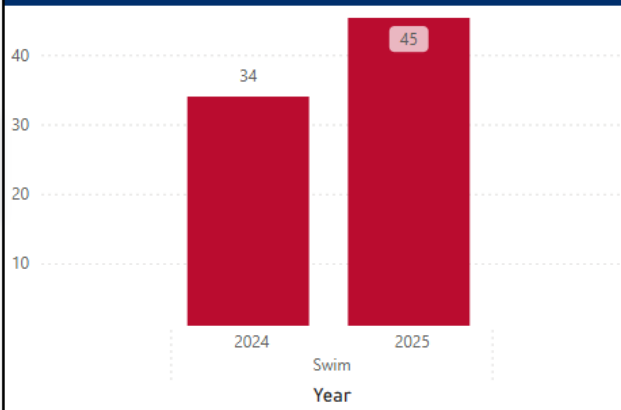

Note: 2023-2025 Elite Men's Continental Cup Racing Series (Excludes Edmonton 2024)

World Cup Sprint Distance Trends

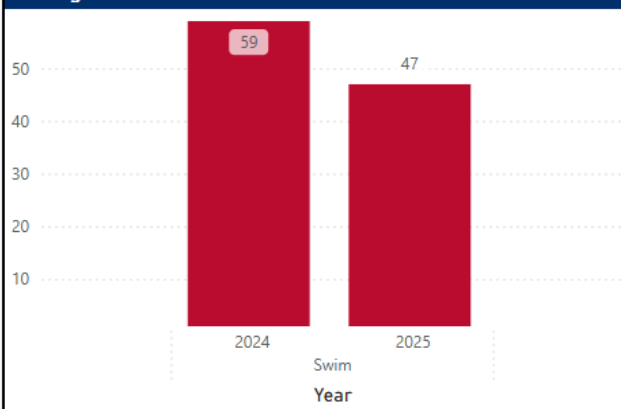

- At the World Cup Level Sullivan has always been a top biker but by improving his swim fitness he now has more energy throughout the race and been able to achieve two Top 10's in 2025 at Napier and San Pedro de la Paz.
- By coming out of the water closer to front, Sullivan remains a key athlete to watch for in races that can quickly eliminate breakaways.

Maintain Swim Deficit with Less Energy

Average Place in Race

Average Seconds Down to Leader

Move Up on the Bike and Run

- In all four World Cup Races Sullivan has achieved the fastest bike split.
- In Napier and San Pedro de la Paz, Sullivan had the 11th fastest runs en route to Top 10 finishes

Move Up From Top 20 to Top 10
