USA Triathlon High Performance

Race Week Schedule

Huatulco

June 12 – 14, 2026 • Plaza Santa Cruz Huatulco, Mexico

Friday • June 12 <i>Familiarization Day</i>	
10:00	Bike familiarization — 3 laps from Bahía Santa Cruz
10:30	Run familiarization
11:00 – 11:45	Swim familiarization — Santa Cruz

Saturday • June 13 <i>Briefing & Packet Pickup</i>	
16:00 – 16:30	★ Mandatory Elite athlete meeting — Hotel Biniguenda

16:30 – 17:00	Packet pickup — Hotel Biniguenda
---------------	----------------------------------

Sunday • June 14 <i>RACE DAY</i>	
05:30	Elite Female lounge opens
06:30	★ ELITE FEMALE START
07:45	Elite Male lounge opens
08:30	★ ELITE MALE START
10:00	Awards ceremony

Times local to Huatulco (CST, UTC-6)

Key Course Differentiators

Huatulco

HUATULCO

Set around Bahía Santa Cruz on Mexico’s Pacific coast, Huatulco is a hot, humid sprint-distance World Cup. The swim is usually non-wetsuit in very warm water; the bike includes a short climbs and technical descents. The run is also exposed enough that heat management becomes a major performance limiter. This race often stays close deep into the run, but the hillier course profile, and heat had led to a high DNF/LAP/DNS history, meaning that athletes need to be ready for a hard, attritional race from the start.

COURSE FEATURES

Heat and humidity are the defining environmental factors. Women start earlier at 06:30, but historical race conditions still show warm air, very warm water, and frequent high humidity.

The swim is a single 750 m loop from Santa Cruz with warm water that has historically sat around 29–32°C when recorded, **making wetsuits extremely unlikely.**

The bike is four laps of a 5 km circuit and has a brief climb. **The only true breakaway occurred in 2025.**

The run is two laps and includes enough elevation to slow 5 km times significantly compared with flatter World Cup sprint courses. **Fastest time in several years was 14:45**

COURSE AT A GLANCE

Swim:	750 m
Bike:	20.0 km
Run:	5.0 km
Format:	Sprint Triathlon
Bike Laps:	4
Run Laps:	2

Swim Course Profile

Huatulco

Source: asdeporte 2026 Elite Swim course map (Natación Elite — Bahía de Santa Cruz)

750 m • single lap

Ocean — Bahía de Santa Cruz (protected marina)

Distance	Layout	Start
750 m	U-shape rectangle	Beach start
Water Temp	Wetsuit	Lap Count
30.5 °C (7-yr avg)	Likely non-wetsuit	1

Tactical Notes

- Single 750 m loop: 300 m east leg, 150 m across south, 300 m west leg, beach exit by transition
- Tight rectangle inside the protected marina. Typically, has minimal chop, current normally low at 06:30 start
- Two turn buoys at the south end with kayak in position here
- Sun rising due east at 06:30. Potential for a bright glare on the outbound 300 m east leg
- Extraction zone marked at north dock; short beach run into T1

Bike Course Profile

Huatulco

20 km • 4 × 5 km loops

Closed urban circuit (Bahía de Santa Cruz → Vialidad 5 → return)

Elevation / Lap

+84.4 m / 84.6 m

Total Climb

~338 m

Avg Grade

3.2%

Max Climb Grade

+18.4%

Max Descent

-14.9%

Loops

4 × 5 km

Tactical Implications

- Out-and-back along Blvd Santa Cruz with a tight technical hairpin at the neutral wheel station
- Single sustained climb up Vialidad 5 is short but punchy (max 18.4%)
- Fast technical descent back into Bahía de Santa Cruz; max -14.9% grade
- Tight start/finish chicane through transition

Run Course Profile

Huatulco

5.0 km • 2 × 2.5 km

Paved urban — Blvd Santa Cruz / Camino a Santa Cruz

Distance
5.0 km

Lap Structure
2 × 2.5 km

Total Climb
~111 m

Avg Grade
4.2%

Max ▲ / ▼
+17.3% / -15.3%

Heat Risk
HIGH

Tactical Notes

- Hilly 2.5 km out-and-back loop. +55.3 m gain per lap (≈110 m total over 5 km)
- Max climb 17.3% on Camino a Santa Cruz; Short steep climb
- Steep -15.3% descent back into Bahía de Santa Cruz
- 08:30 men's start will likely have hot temperatures
- Course turnaround at the 2 km mark off Blvd Chahue — sharp 180° on a slight uphill

Race-Day Weather Outlook

Huatulco

2026-06-14 • Historical climatology

Female start — 06:30		
Temperature	Apparent / Heat	Humidity
23.8 °C	28.3 °C	91%
Wind	UV peak	Heat Stress
3.7 km/h	—	HIGH

Male start — 08:30		
Temperature	Apparent / Heat	Humidity
26.6 °C	31.4 °C	81%
Wind	UV peak	Heat Stress
3.8 km/h	—	HIGH

Hydration & Cooling Cues

- Men's race runs 2.8 °C hotter than women's

Data source: Open-Meteo. Forecast will replace climatology once race day is within 16 days.

Environmental Risk Profile

Huatulco

RACE-DAY WEATHER (08:00–11:00 local)

Year	Date	Air Temp	Humidity	Wind km/h	Precip mm
2018	Jun 10	29.2	72%	10	0.0
2019	Jun 08	28.3	77%	4	0.1
2021	Jun 12	26.8	82%	16	0.0
2022	Jun 18	28	68%	6	0.0
2023	Jun 17	32.8	60%	7	0.1
2024	May 18	29.3	62%	7	0.0
2025	Jun 22	24	96%	4	2.6

AIR QUALITY (Open-Meteo archive)

Year	PM2.5	EU AQI	UV Index	Risk
2018	—	—	—	—
2019	—	—	—	—
2021	—	—	—	—
2022	—	—	—	—
2023	7.7	21	5.3	Fair
2024	4.3	20	4.3	Good
2025	3.4	16	4.5	Good

HEALTH & WATER QUALITY RISK FACTORS

Water Quality: No public Huatulco race-week illness cluster found.

Athlete Health Incidents: No known Huatulco-specific GI illness pattern found.

Water Temperature: Historically very warm when recorded: 2022 men/women ~29–31°C, 2023 ~31.7–31.8°C, 2024 ~30°C, 2025 ~29°C. Expect non-wetsuit and warm-water swim load.

Heat / Humidity: High risk. Historical race-window air temperatures range from ~24°C to 35°C, with humidity often above 70% and as high as 96% in 2025. The women start at 06:30, which helps, but heat load is still a major limiter.

Weather and AQ data: Open-Meteo historical archive (archive-api.open-meteo.com). EU AQI: Good ≤20, Fair ≤40, Moderate ≤60, Poor ≤80, Very Poor >80.

ELITE MEN

Race Overview — Elite Men

Huatulco

3 KEYS TO SUCCESS

1

Prepare for a non-wetsuit swim. Water temperature around 30C will not only be non-wetsuit but feel very warm. With such warm temps, this has limited the top swimmers from attacking the swim. Expect for at least 15 athletes to exit the water close to each other with the main group not far behind.

2

2025 saw the first true breakaway stick at this course. However, the lead group of 3 was only able to get ~40s for the effort. Likewise in 2023 a much larger breakaway group only put ~60s on the chase. With two long straightaways, expect for the bike to come together if there is a train coming from behind

3

Heat and elevation on the run drives a slow 5K. The fastest time since 2018 is 14:45 with many years having no one go under 15:00. Trust in the Park City hill training and make your move against the competition on the second lap year. To achieve a top 10 result you'll likely need to be within 35-45 seconds of the winner.

ELITE WOMEN

Race Overview — Elite Women

Huatulco

3 KEYS TO SUCCESS

1

Stay attached through the swim and first bike lap. Huatulco does not always reward an all-out swim break, but missing the first organized group can be costly. The women's race has ranged from very small groups at T1 to larger groups by T2, so the first priority is exiting close enough to avoid spending the opening bike lap chasing in the heat.

2

The bike groups have historically been able to breakaway from the field and form a smaller lead of less than 20 athletes. If you are able to make a similar group its not uncommon to put ~2 minutes into the chasers, helping solidify better positioning into the run.

3

The Huatulco 5K is slower than a flat sprint-course run because of heat and elevation. The winning move is often about staying controlled early, managing the climb/descent rhythm, and being close enough to fight over the final 1–2 km. Based on recent gaps, a top-10 result likely requires staying within roughly one minute of the winner, and podium contention can come down to seconds.
