Key Course Differentiators

Alghero

ALGHERO

Set on Sardinia’s Coral Riviera, Alghero is a coastal Olympic-distance course built around San Giovanni Beach, the port, and the historic city centre. It is not a pure flat-power course: the bike includes some uphill/downhill sections, repeated direction changes, and enough technicality to make positioning important before the run.

COURSE FEATURES

- Beach/pontoon-style sea swim at San Giovanni Beach; 1.5 km over two laps with the first buoy ~325 m from the start.
- 40.5 km bike over 9 laps; coastal urban circuit with some uphill/downhill sections and many direction changes.
- 10 km run over 4 laps through the centre of Alghero and along the seafront; likely pavement/urban surface.
- Late-May conditions can be hot and exposed: 2025 race day was ~27–28°C, humid, and wetsuit-forbidden.

COURSE AT A GLANCE

Swim:	1.5 km
Bike:	40.5 km
Run:	10.0 km
Format:	Standard Triathlon
Bike Laps:	9 (~12 key turns/lap est.)
Run Laps:	4 (surface likely pavement)

Environmental Risk Profile

Alghero

RACE-DAY WEATHER (08:00–11:00 local)

Year	Date	Air Temp	Humidity	Wind km/h	Precip mm
2025	May 31	27	72%	9	0.0

AIR QUALITY (Open-Meteo archive)

Year	PM2.5	EU AQI	UV Index	Risk
2025	6.0	30	3.4	Fair

HEALTH & WATER QUALITY RISK FACTORS

- **Water Quality: Low to No Risk.** 2026 athlete guide reports San Giovanni test values well below limits: E. coli 44–51 CFU/100ml vs 500 limit; fecal enterococci 14–25 CFU/100ml vs 200 limit.
- **Athlete Health / GI Risk: Low to No Risk.** No public Alghero race-week illness cluster or swim cancellation found.
- **Water Temperature: Borderline. Likely non-wetsuit.** 2025 race measured ~21.8–22.0°C and was wetsuit-forbidden. Athlete guide lists late-May San Giovanni range at ~15.5–21°C, so 2026 could still be borderline depending on week-of weather.
- **Heat / Humidity: Moderate Heat.** 2025 was warm for WTCS racing: ~27–28°C air temp with ~72% humidity. Women race at 11:00; men at 14:00, so heat load and cooling/hydration are factors to consider given the Olympic distance.

Denver to Alghero Travel

No direct AHO service from DEN, likely 1–2 stops through a major European hub and Rome/Milan. Roughly ~20h hour travel door-to-door. 8 hour time-zone change. Non-EU and Schengen Area citizens require an invitation letter and declaration from the National Federation for participation at the event.

Host Hotel / Official Accommodation Read

- Official host hotel: [Hotel Calabona](#), Località Calabona; 4-star seaside property listed by WTCS travel page.
- Logistics read: outside the port/transition area but close enough for LOC shuttle support; hotel is roughly a 15-min walk from Alghero's historic centre.
- Quality read: strong sea-view/pool/private-beach profile; reviews generally note clean rooms and good breakfast, but some describe the hotel as a little dated/rustic.
- Price read: public OTA snapshots vary; recent examples cluster around ~\$85–120/night before race-week demand.
- Athlete note: good base if the team uses official transport; plan one grocery stock-up because immediate supermarket access is not as dense as Yokohama.

Food / Grocery Options Near Hotel + Venue

- Best stock-up targets: Conad / Coop / Eurospin in Alghero for fruit, yogurt, rice/pasta, breakfast staples, drinks, and room food.
- Quick hotel-side options: expect smaller local markets and cafés near Calabona; larger selection is easier closer to town / Lido.
- Restaurant read: old town + waterfront have many options; near Calabona, Quintilio / La Saletta style seafood and simple Italian options are close.
- Food risk: Low. Sardinia/Alghero is very traveler-friendly with strong reviews

ELITE MEN

Race Overview — Elite Men

Alghero

RACE HISTORY AT ALGHERO

Alghero debuted on the WTCS calendar in 2025 and immediately offered a hard race that results in 10 DNF/LAPs in a field of 43 athletes. A small group of 20 came out of T1, but a hard bike punctuated by significant hill allowed an exclusive of 8 to open a 103s gap to the chase. Hidalgo ultimately went on to win with a 30:05.

All stats only include athletes that finished the race

3 KEYS TO SUCCESS

1

Swim positioning is paramount. There were no major breaks on the swim but the athletes towards the front of the spear were able to get the work on bike and separate quickly.

2

Aggressive and controlled bike handling. 10 athletes race came to an early finish on the bike leg. Expect to be on the rivet through rolling climbs and be aware of crash potential.

3

Expect a hard and hilly but not overly fast run. Only one athlete managed to break

Results Summary — Elite Men

ELITE WOMEN

Race Overview — Elite Women

Alghero

RACE HISTORY AT ALGHERO

Alghero's first WTCS women's race was more selective than the men's race from the start. Only 7 athletes were in the lead group at T1 and 6 remained at T2, with a 142s gap to the chase. Beaugrand won from the front group, reinforcing that this course can reward a true swim-bike selection before the run begins.

All stats only include athletes that finished the race

3 KEYS TO SUCCESS

1

Fast swimming can set up for a top 15 finish here. Only 2 women that missed the front swimmers were able to finish in the top 10.

2

Missing the front bike group here meant missing the podium but not the top 5-10 spots. Despite a two-minute deficit, Leonie Periault managed to catch two of the leaders and run into 5th.

3

Prepare for a sub-35-minute 10k here. In 2025 5 women including the winner ran under the threshold.
